ERGONOMIC SUPPORT

PU microbubble structure helps distribute weight evenly, improving posture and reducing fatigue throughout the day.

THERMO-ADAPTIVE

Adjusts to the temperature of your feet, helping keep them cool or warm depending on the environment.

BREATHABLE

Thanks to its microcell and fabric design, it promotes airflow circulation to keep feet fresh and dry.

ANTIMICROBIAL PROTECTION

Its antibacterial surface helps resist abrasion while preventing the spread of fungi and bacteria, keeping your feet healthy and odor-free.

IMPACT ABSORPTION

Engineered with high-density materials that effectively reduce impact force, providing greater protection and comfort with every step.

DEFORMATION-RESISTANT STRUCTURE

Made with ergonomic superflex polyurethane. Its advanced design and formulation help maintain shape over time while staying flexible and adaptive to your feet.

Experience maximum comfort and protection in your safety footwear with our high-performance anti-fatigue insole.

Designed to reduce pressure on your feet, helping prevent fatigue and improve stability while walking, allowing you to perform at your best during long shifts and demanding environments.

Protection performance specifications are subject to general conditions and laboratory testing. For proper product selection, please request professional guidance before choosing your footwear.
