MOD. **KRAKEN**

INJECTED POLYURETHANE SAFETY BOOT

SKU: 304366

CATEGORY: INDUSTRIAL USE

CONSTRUCTION: INJECTION MOLDED

PROTECTION: M / EH / SR

LAST: EEE

SIZE: US MENS: 5-14

EUR: 37-46

GENDER: UNISEX

US WMNS: 6-15

cm: 23-32

• **-22° F TO 176° F** • **THERMAL** • **WATERPROOF** • **ANTIBACTERIAL**
• **SLIP-RESISTANT** • **ULTRA LIGHTWEIGHT** • **FLEXIBLE**

RT-HydroX

Advanced waterproof sealing system engineered to completely block water penetration, delivering superior performance and total moisture protection.

RT-DualDensity

Dual-density system engineered to balance cushioning and structural support.

Electrical Hazard Protection

Protective system engineered to prevent electrical current conduction. Its non-metallic composition acts as an insulating barrier, ensuring safety in environments with electrical hazard exposure.

STRUCTURE: PU-AirPro

Crafted from low-density Superflex polyurethane, this material delivers exceptional lightweight comfort and outstanding flexibility, adapting naturally to your movements. It provides excellent thermal insulation to keep feet comfortable in varying conditions, while maintaining reliable performance in both low and high temperatures.

OUTSOLE: PU-ImpactPro

High-density, compact Superflex polyurethane engineered to provide enhanced resistance to friction, abrasion, oils, and gasoline. Its specialized formulation, combined with the outsole design, delivers reliable slip-resistant performance.

INTERIOR LINING: Poliester

Internal polyester lining designed to maximize comfort and foot well-being throughout the workday. Its breathable construction promotes optimal airflow, preventing moisture buildup and keeping feet dry and cool, enhancing overall comfort and reducing fatigue during long shifts.

INSOLE: Anti-fatigue

Ergonomic super-flex polyurethane insole; shock-absorbing and non-deformable, with the same lifespan as the footwear. Breathable and antibacterial with silver nanoparticles for total moisture management and hygiene.

Protection specifications are subject to general conditions and laboratory testing. For greater certainty, please request a consultation before choosing your footwear.
